

# Quantification of Business Losses owing to Cyber Threats

Sector: Civil Engineering

## Company Overview

A Civil Engineering enterprise with digital transformation strategies. It has over 300+ clients. It comprises a group of people with high technical skillsets, excelling in engineering, design, finance, construction and operation and maintenance of such ventures.

## The Challenge

They were continuously losing tenders leading to their business losses. Few companies were winning tenders by \$4 to \$5 which was very astonishing. By the time they could find out the hacking attempts to went too late as they weren't able to flag it realtime.

## The Solution

They decided to put a realtime intelligent security monitoring tool and selected ZERON. Our team helped with onboarding, training and to bring everyone to the same page in ZERON. Post that the whole security process became consistent, intelligent and real-time.

## Results

Within a month we measured results post the implementation of ZERON. Here are the highlights of the KPI's.

### **REVENUE SAVED**

**\$18,546**

### **COMPLIANCE SCORE**

**85%**

### **BUSINESS GROWTH**

**1.5x**
